WITH THE CIRCULAR ECONOMY IN MIND

Circular Plastics

BEWI is a pioneer within circular economy for plastic material. We have led and participated in several R&D projects, bringing recycled materials back to life. Our experience has given us a unique knowledge for using additives in recycled plastic. With a good network along the entire value chain, plastic production, design and product strategies. We have removed several obstacles for plastic recycling.

Circular economy (resources kept in the cycle for as long as possible) is one of EU's future priorities. "Closing the loop" is the EU's slogan.

BEWI will continue to focus on quality and do what it takes to secure good and reliable raw materials for the industry.

We made a promise to lead the change towards a circular economy – this is everyone's responsibility. Together we can create a demand for recycled content within our product portfolio, to increase the demand, and become more efficient and competitive regarding volume and price. Now it is up to us to accelerate this journey and encourage our customers to choose recycled alternatives.

Designed for reusage

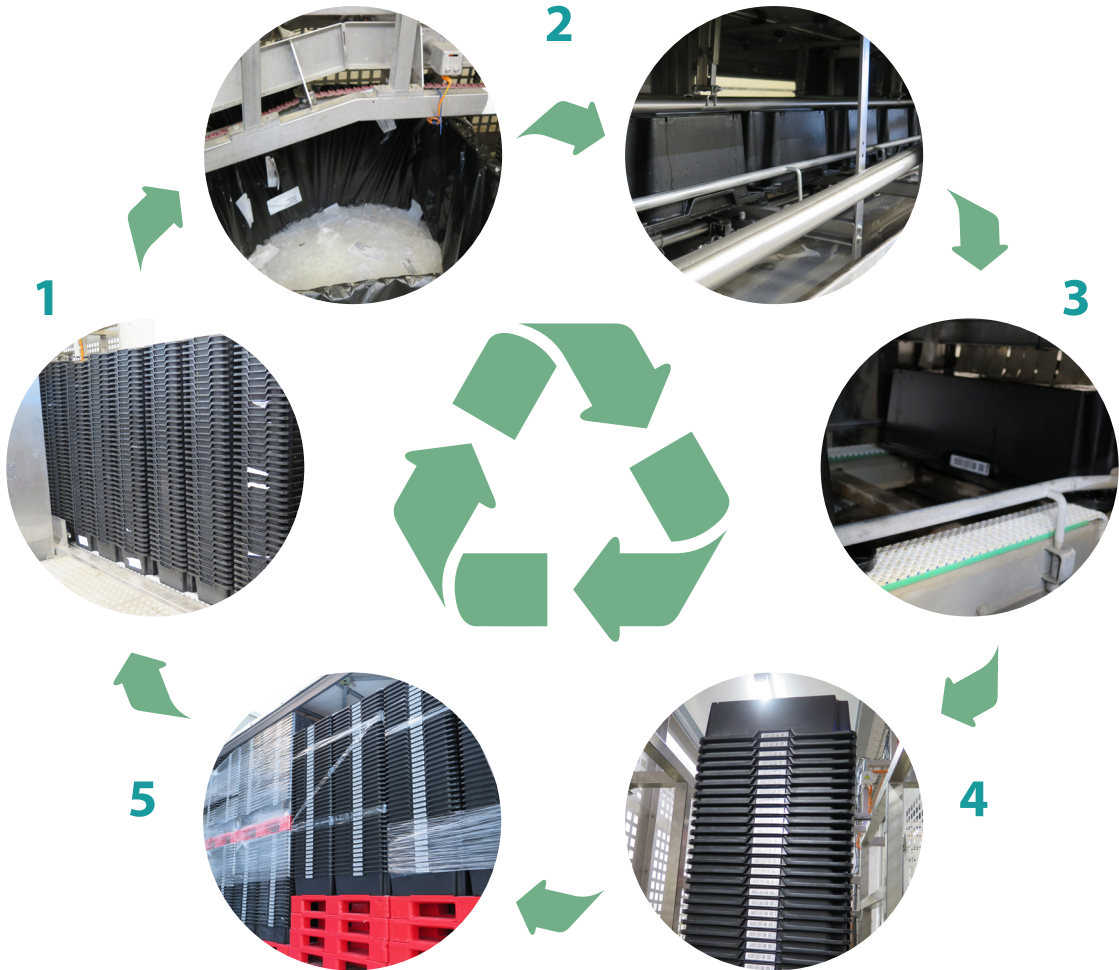

Designed with rounded corners for easier cleaning. Stackable for faster and more compact packing.

The life cycle of the box :

- 1 Dirty boxes are fed into the machine in stacks.
- 2 The individual boxes are pressure washed with soap and water to remove all dirt, grime and labels.
- 3 The boxes are then pressure washed with 92 °C water and spin dried.
- 4 Clean boxes are then re-stacked.
- 5 Clean boxes are then ready to be delivered back to the customer.

BEWI REBOX - CLOSED LOOP

BEWI PALLET

- The sustainable choice

BEWI pallet - Pros

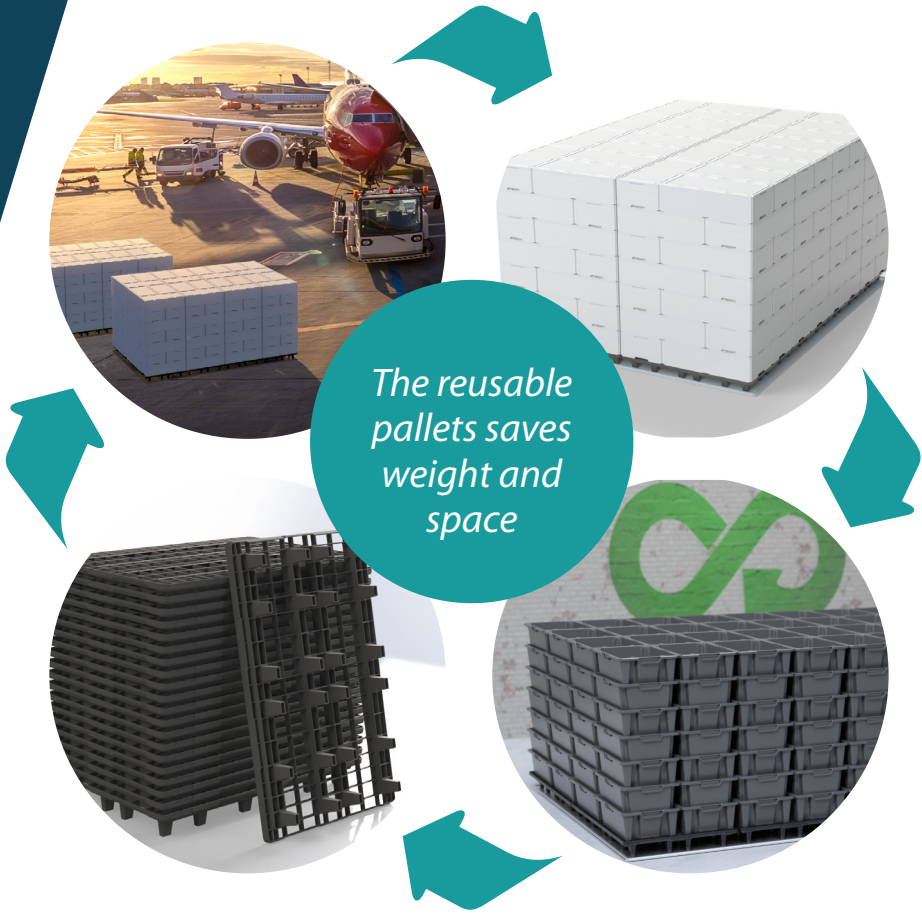

- Preloaded - Aircraft PMC
- Provides an extra 175 kg per PMC
- Reduces your shipping costs
- Aircraft shipment
 - Reduces CO² emissions by 5%
- Low weight - 30% lighter than wood
- Leaner and efficient pallet flow
- Forklift to unload reduce labour cost
- Deposit value options

Wooden pallets - Cons

- Manual loading increases your labour costs
- Landfill costs or burning of wooden pallets
- Heavy - bad HSE (health, safety & environment)
- Space consuming

The sustainable pallet system for the future

Save your shipping costs by reducing truck and plane waiting time

IML

High quality labels
with flexible solutions

IML merges the label with the packaging, this makes it possible to recycle the product as a whole – a sustainable choice.

We have over 40 years experience in the trade.
If you need help with design or the best packaging solution, ask us.
Involve us at your R&D stage - choice of material, design and efficient production process.

IML is highly flexible, and you can print any design you wish. It has a high colour vibrance and gives a high-definition print. It comes in glossy, textured, transparent or uncoated. We offer several types of IML labels. Talk to us – together we find the best solution for your product.

We have top of the line equipment giving you the best result on the market.

- Recycle labels and packaging as one
